April 8, 2021

Dear Airport Tenants,

Starting in mid-May, the Lancaster Airport will begin the first phase of a three-phase construction project. The project consists of the rehabilitation of runway 08-26 as well as improving the runway drainage. Over the years, the runway was constructed using several different methods which, although safe, do not meet current FAA standards. In addition to being non-standard, 08-26 currently experiences storm water ponding mid-field; presenting a safety concern and the need for rehabilitation.

The work for this project will take place on the existing asphalt runway as well as the safety areas directly adjacent to the runway. To minimize the impact to the airport as much as possible, the construction will be done over eight long weekends. The weekend closures will affect runway 08-26 and several adjoining taxiways. The closures will begin each Friday at 6:00pm through Tuesday morning at 6:00am. Runway 13-31 will remain open during the long weekend closures. NOTAMs will be issued prior to all closures. Please see the attached exhibit A below for the dates and times of the closures.

As always, the safety of Airport users, employees and construction workers is our number one priority. We appreciate your cooperation and support as we continue to make these critical improvements to the Lancaster Airport.

Austin Beiler
Facilities Administrator
Lancaster Airport Authority
